Title: Service Optimization in The Caf via Food and Traffic Data

<u>Names:</u> Connor Sherrill, Mia Guzman, Eli Donovan, Will Denning, Justin Hortopanu (Group 3)

<u>Question:</u> Can we predict traffic and food demand in dining halls to reduce waste and improve service?

<u>Description:</u>

<u>Plan:</u>

- Find a domain expert:
    1. Contact TTUDining@tntech.edu notifying them were are a separate team
    2. Ask for possible separate questions they might liked answered
    3. If a good idea, ask for data, otherwise pivot into a separate direction

- Dates (*with a lot of work room*):
    - Thursday, Feb 19th - Acquire data
    - Thursday, March 5th - Clear data
    - Thursday, March 26th - Explore data
    - Thursday, April 9th - Visualize data
    - Thursday, April 23rd - Finalize Report And Presentation
    - Tuesday, April 28th - Due Date!!!!!!

- No classes:
    - March 16th - March 20th
    - April 2nd and 3rd
